

Department of Physics

Safety Objectives & Programmes 2018

- To set up an enhanced gas cylinder management system by 31 December 2018 with the aim to achieve 100% compliance to the university's gas cylinder safety requirements.
 - Individual chaining of gas cylinders
 - Proper segregation of different types of gas cylinders
 - Timely return of unused/ empty gas cylinders
 - Availability of gas leakage detection systems & timely calibration of these systems
- To enhance department safety and health standards by reinforcing audit/inspection programme with the aim to achieve 80% of academic supervisors with no category findings in Academic Supervisor SHMS audit in 2018
 - Review of SHMS
 - Reinforce safety inspection regime
 - Reinforce safety training
 - Creating positive safety culture
