Guidelines for part-time MSc (coursework) project.

1. The part-time MSc Physics (coursework) project is equivalent to 12 MCs (3 Modules), and it is equivalent to 16 MCs (4 Modules) for the part-time MSc Applied Physics (coursework) project. The amount of work involved should be more than an Honor project but less than an AMP project (equivalent to 6 modules - 24 MCs).

2. The quality of the work: Higher than an Honors project but less than a project in MSc by research.

3. Thesis write-up: not more than 80 pages, including text and figures, but excluding extended data sheets and programs. They can put them as appendix if there is not enough space.

4. Assessment: The project is graded based on a thesis assessment by two internal examiners and the supervisor, and an oral presentation attended by the examiners and the supervisor.

5. The project should be finished within 3 semesters. The project thesis should be submitted at least one month before the end of the last semester.
